Subject: Solar Feed in review

I wish to advise that I regard this as very important for pensioners who have Solar panels producing power. As money is very hard to obtain this cheaper Power is needed to help with our life style.

I saved up to purchase Solar (did not buy new car). I have been extremely pleased with this investment. At this time of year this Solar power has kept me warm day and night.

Why should the present rebate have to go down. Once again pensioners and people who have wisely invested in Solar are targeted by present Government.

Kindly and urgently reconsider the rebate.

Regards Margrit Korosi
