

Dear DSG.

Thank you for the opportunity to comment. I adopt and endorse PMAT's submission, attached.

For my part, this kind of strategy should have been implemented 25 years ago. Then, with a planning framework that recognised the true limits of air, water, land and ocean, a strategy could have been adopted that would protect Tasmania's amazing values and at the same time, allow for thoughtful and intelligent development as needed. That goal is elusive in this State.
