To whom it may concern,

RE: DEB INSTANT FOAM is identical to the TGA registered product CUTAN ALCOHOL FOAM ANTISEPTIC HANDRUB (AUST R 274983)

Under the current circumstances of Covid-19 pandemic, the TGA has no objection to the supply of Deb InstantFOAM to healthcare settings/hospitals, provided that the purchaser/customer is alerted about the differences in the doses/directions for use between *Deb InstantFOAM* and the registered product *CUTAN ALCOHOL FOAM ANTISEPTIC HANDRUB (AUST R 274983)*. Hence, I can confirm that Deb InstantFOAM and the TGA registered product CUTAN ALCOHOL FOAM ANTISEPTIC HANDRUB (AUST R 274983), are identical in formulation.

To avoid disruption in supplying the alcohol hand sanitisers to healthcare professionals, SC Johnson Professional will be supplying Deb Instant Foam products to be used in hospitals and healthcare facilities until Cutan Alcohol Foam Antiseptic Handrub (AUST R 274983) becomes readily available again.

To achieve antiseptic and surgical scrub efficacy claim, the product Deb InstantFOAM should be used as directed for CUTAN ALCOHOL FOAM ANTISEPTIC HANDRUB (AUST R 274983).

I trust this provides you with the assurance you are seeking.

Please do not hesitate to contact me if you have questions.

Yours faithfully,

Rizalie Vergara
Regulatory Affairs Manager
