QUESTION TIME BRIEF

SUBJECT: ROAD MAINTENANCE ISSUES - BASS HIGHWAY out of scope
[REDACTED]

Updated: 14/10/2025

KEY MESSAGES

- There were significant potholes on sections of the Bass Highway between Deloraine and Latrobe, in North West Tasmania.
- There have been a number of rainfall events over the past year that have contributed to the number and size of potholes in these areas.
- The Department of State Growth continues to work with its two road maintenance contractors Stornoway and Fulton Hogan across the three regions on developing a stronger partnering approach in delivering safe and efficient road maintenance outcomes, including minimising potholes along the Bass Highway and other key freight routes.
- The department is also working with several contractors to rectify defects in road construction projects on the Bass Highway and one other site in the north-west that have experienced some pavement and seal failures over the past two years.

Talking Points:

Bass Highway

- During the past 12 months, there have been times when significant potholes have occurred on the Bass Highway in the North West, exacerbated by rainfall.
- The department's North West maintenance contractor has made a concerted effort since late 2024 to address potholes on the Bass Highway.
- There have also been a number of sites on the Bass Highway where construction, renewal or rehabilitation works failed prematurely leading to the perception of broader deterioration of the highway.
- Nineteen sites along the length of the Bass Highway were completed as part of the 2024-2025 resurfacing program – eleven spray seal, four asphalt and four water blasting sites to maintain and improve the condition of the highway.
- Twelve new resurfacing sites have been programmed for the Bass Highway as part of the 2025-26 program – six spray seal and six asphalt sites.

Other activities

- Construction contractors are responsible for the rectification of any defective works, and the department is working closely with several contractors to ensure that the rectification works across these sites are completed in a timely manner.
- In the North West region, the department is working with the maintenance contractor to identify and undertake priority

minor pavement repairs in addition to delivering road resurfacing.

- The department continues to work with both maintenance contractors across the three regions on a stronger partnering approach in delivering safe and efficient road maintenance outcomes.
- Additionally, the department has been:
 - identifying innovation and collaboration opportunities within road maintenance
 - reviewing the maintenance contracts including engaging with other Australian jurisdictions on best practice contract models.

This stronger partnering arrangement has already seen a new micro-stabilisation treatment trial in the North to rectify some pavement failures.

Background and Facts

- There are road maintenance contracts for each of the three regions of the state – north, north west, and south to maintain around 3,800 km of roads and 1,266 bridges and major culverts.
- Each maintenance contract covers routine maintenance tasks for the region, with a separate contract for periodic works (sealing and renewal) and the department prepares a program of periodic works on an annual basis.
- The Maintenance Contracts are currently held by:
 - North West - Stornoway Pty Ltd
 - South - Stornoway Pty Ltd
 - North - Fulton Hogan.
- The Bass Highway runs from the Midland Highway at Launceston through to Marrawah in the far North West and for strategic management purposes is identified as follows:
 - Launceston to Wynyard – Category One Trunk Road
 - **Out of scope** [REDACTED]
 - [REDACTED]
- The maintenance inspection regime for the Bass Highway is aligned with the strategic network, with the category one section inspected more regularly than the remaining sections.
- There have been a number of sites on the Bass Highway where construction, renewal or rehabilitation works have failed in the past two years leading to the perception of broader issues on the Bass Highway. These sites include:
 - South of Parramatta Creek – a pavement renewal site with defects that is currently being managed by the department. Investigations to determine cause and treatment have been completed. Rectification works will be completed over the 2025-26 construction season.
 - Elizabeth Town – a pavement renewal site that has defects in one lane, and investigations to determine cause and treatment have been completed. Rectification works will be completed over the 2025-26 construction season.

- Railton Road to Parkham Road, Elizabeth Town – road surface repairs to be completed over the 2025-26 construction season.
- Sassafras Roadhouse – road surface repairs were scheduled and completed by end February 2025; however, repair works are not to the required standard. The department is working with the contractor to rectify the latest performance issues, with the pavement markings reinstated during May 2025.

QUESTION TIME BRIEF

SUBJECT: ROAD CONDITIONS IN THE NORTH WEST

Updated: 8/09/2025

KEY MESSAGES

- A cold front crossed Tasmania on Sunday, 7 September 2025, bringing widespread rainfall totals up to 100mm across North and North West Tasmania.
- During the weather event there were ten call outs in relation to the State Road Network made in the North West region, all of which occurred on the Bass Highway.
- The department's maintenance contractor was able to respond and rectify all ten call outs on the day.
- All three regional maintenance contractors are engaged to provide 24/7 coverage for emergency events across the State Road Network.

Talking Points:

- During the weather event there were ten road maintenance call outs made in the North West region, all of which occurred on the Bass Highway, with:
 - 7 call outs for water over the road
 - 2 for potholes
 - 1 for additional signage at a road location where there was water over the road.

- The pothole call outs were located:
 - **Out of scope** [REDACTED]
 - [REDACTED]
- Five more call outs have been received to midday on Monday 8 September as follows:
 - 3 for trees down on Murchison Highway, Bass Highway and Olivers Tourist Road
 - 3 for potholes, both on the Bass Highway.
- The department's maintenance contractor was able to respond to and rectify all ten call outs on the day by either repairing the defects or arranging for appropriate traffic management until the intensity of the rain reduced.
- The maintenance contractor has five crews actively managing pavement defects on the Bass Highway including:

 - 21 for potholes on various roads, including the Bass Highway.
- The department's maintenance contractor was able to respond to and rectify all ten call outs on the day of the event by either repairing the defects or arranging for appropriate traffic management until the intensity of the rain reduced.
- The maintenance contractor had five crews actively managing pavement defects on the Bass Highway including:

- The department has completed a large amount of resurfacing on the network since 2023, including on the Bass Highway, and Stornoway has made some reductions in outstanding defects on the network, including on the Bass Highway.
- There have been a number of sites on the Bass Highway where construction, renewal or rehabilitation works have failed in the past two years leading to the perception of broader issues on the Bass Highway. These sites include:
 - South of Parramatta Creek – a pavement renewal site with defects that is currently being managed by the department. Investigations to determine cause and treatment have been completed. Rectification works will be completed over the 2025-26 construction season.
 - Elizabeth Town – a pavement renewal site that has defects in one lane, and investigations to determine cause and treatment have been completed. Rectification works will be completed over the 2025-26 construction season.

- Railton Road to Parkham Road, Elizabeth Town – road surface repairs to be completed.
- Sassafras Roadhouse – road surface repairs were scheduled and completed by end February 2025; however, repair works are not to the required standard. The department is working with the contractor to rectify the latest performance issues, with the pavement markings reinstated during May 2025.
- The level of potholing of roads in the North West has been a concern since a significant August 2024 rain event, and since that time the department has been working with the north west maintenance contractor to rectify road defects in a timely manner.
- The current potholing data since 1 July 2025 provides the following overview of the situation in the North West:
