Subject: HPRM: feed in tariff

Minister concerned, I have had a 4.2kw system for about 6 years and have received the higher feed in rate for that time, to cut the rate back to 8.5 cents would be totally wrong for all users. A fairer rate would be to pay the same amount that I would have to pay to buy my power back. I am only a pensioner on a aged pension and the outlay my system cost me took a chunk out of my savings.
