

Value of Tasmania's international exports

By market

2016-17 to 2020-21

Total value of Tasmania's international exports - markets

Sources

Based on custom reporting data supplied by Australian Bureau of Statistics.

5368.0 - International Merchandise Trade, 2021.

Caveats/advice for users

While the ABS recognises the importance of international trade statistics to a wide variety of users, the quality of very detailed data (e.g. eight digit exports and ten digit imports, by port, by state, by market) cannot be guaranteed, as resources are not available to assure data quality at this level. The detailed data released is largely 'as reported' to Customs.

FOB Value: The value of goods measured on a free on board (fob) basis includes all production and other costs incurred up until the goods are placed on board the international carrier for export. FOB values exclude international insurance and transport costs. They include the value of the outside packaging in which the product is wrapped, but do not include the value of the international freight containers used for transporting the goods. Information on the CIF and FOB values for imports is reported only once for each Customs import declaration, regardless of how many separate lines and/or commodities that declaration may contain. As a result, any declaration with more than one line will not necessarily correctly allocate CIF and FOB values to the individual commodities.

Market of final destination: For exports, 'market' refers to the final destination of goods at the time of export. The ABS refers to the list of countries recognised by Customs and the Department of Foreign Affairs and Trade (DFAT) to classify and disseminate international merchandise trade statistics by country. Self-governing territories and dependent territories under the administration of other countries may be treated as individual countries in international merchandise trade statistics. ABS international merchandise trade statistics incorporate changes to the political boundaries of countries and changes to official country names once they are recognised by the Australian Government. A list of all countries used for the dissemination of trade statistics at any given time can be obtained from ABS Information Consultancy.

State of origin: For exports, State of origin is the Australian State in which the final stage of production or manufacture occurs.

For further information please contact the Trade team at trade@stategrowth.tas.gov.au
