

TASMANIAN POLAR NETWORK

NEW MEMBERS 2018-19

CHAIR'S MESSAGE

I commend to you these new Tasmanian Polar Network members.

The TPN continues to grow in parallel with the Antarctic sector in Tasmania which is facing an exciting era.

The TPN has become a well-recognised asset within the sector and reflects the diverse Antarctic capabilities of Tasmania.

TPN members are experts in their field and many have been successfully involved with hundreds of Antarctic expeditions or projects.

The people who work in these businesses are passionate about the sector and understand their customers.

When you deal with a Tasmanian Polar Network member you can expect outstanding advice, support and service.

Our new members align well with the TPN ethos and it is my pleasure to present them to you.

A handwritten signature in black ink, reading 'Richard Fader'.

Richard Fader
CHAIR TPN

MJOLL PTY LTD

Technical and management consulting services, specialising in

- Antarctic aviation
- Ice and snow runways
- Traverse and logistic operations
- Expedition planning and approvals.

Stuart McFadzean has extensive project and capital works experience having developed inter and intra continental aviation systems for both government programs and private operators in Antarctica.

This includes support activities such as the siting of runways, fleet acquisition, construction and commissioning activities, regulatory approvals / certifications, and the development of supporting logistic capabilities.

ECHOVIEW SOFTWARE

Echoview Software has a long-standing (>20 years) relationship with the Australian Antarctic research community.

The software was originally designed and developed by scientists working at the Australian Antarctic

Division, and it continues to be used by Australian and international scientists as a critical tool for ongoing research into the Southern Ocean ecosystem.

ANTARCTIC SCIENCE FOUNDATION

The Antarctic Science Foundation is an independent Tasmanian based, international environmental charity that invests in courageous scientific research in the Antarctic, subantarctic and Southern Ocean natural environments.

Through collaborating with businesses, scientists, philanthropists, the community and government, the Antarctic Science Foundation raises funds and builds partnerships to support research that protects and deepens our understanding of the extraordinary Antarctic environment and its profound influence on our planet's climate and ecosystems. Support Antarctica and learn more about its global impact by joining us on our journey as a founding donor or by supporting a project.

VIVA ENERGY

Viva Energy is one of Australia's leading energy companies with a proud 110-year history in Australia, and supplying approximately a quarter of the country's liquid fuel requirements. We own and operate the Geelong Refinery, one of only four refineries in Australia. It supplies over 10 percent of Australia's fuel and is the only Australian manufacturer of avgas, bitumen and solvents. The refinery also has the ability to produce speciality products, including Antarctic grade fuel.

Our robust supply chain in Victoria, allows us to be a major supplier of high quality fuel into Tasmania. A strong supply chain, coupled with the right experience, means you can be confident fuel is delivered securely and safely. Partner with Viva Energy today.

HADLEY'S ORIENT HOTEL

Hadley's Orient Hotel was first built in 1834 by convict labour and has long been an iconic hotel in Hobart.

In 1912 Roald Amundsen made Hobart his first port after beating Captain Robert Scott in the race to the South Pole.

When in Hobart Amundsen stayed at Hadley's.

Hadley's is now a beautifully restored property in central Hobart and we continue to welcome adventurers from all over the world.

Offering a range of hotel rooms & suites, event and meeting spaces, bar and restaurant we welcome you to come and experience Hadley's.

VEC

In 2018 the Department of the Environment and Energy, Australian Antarctic Division engaged VEC Civil Engineering Pty Ltd (VEC), with their head office based at Ulverstone in Tasmania's North West, as the Managing Contractor to manage the design and construction of the new research station and field-huts on Macquarie Island.

VEC is contracted initially to deliver the planning phase including the engagement of multiple design engineering and architectural consultants. The new station is expected to be significantly more efficient than the existing station and designed to minimise operating and maintenance costs.

The construction and commissioning of the new research station and renewal of the field-hut network is scheduled to be completed by late 2022.
