To whom it may concern.

I'm writing this letter to express my views on the lowering of the feed in tariffs for solar power which at the moment I am locked in at 28 cents per Kw. This amount of 28 cents per Kw with my 5Kw of solar on my house lets me have a neutral power bill each year. This helps me so much because I'm an aged pensioner and not having to have the worry of a big power bill each quarter. My initial expense of having these solar panels fitted on my roof is finally paying off but if the feed in tariffs were to be lowered this would put me in a difficult financial position and would like to see the tariffs stay the same. Thank you.
