

PPE Items Available

The items listed below are the main items that we are fielding requests to supply. St John have access to many other items – if you need something that is not on the list, please ask. We effectively have our own group of manufacturers who supply predominantly to St John. We also have access to other medical & sanitation suppliers. These key strategic alliances stand us in good stead to not only access supply but maintain quality and reliance: many of our products are TGA approved.
