Subject: submission

I wish to submit my opinion on the solar feed –in tariff review but can't find a form to do so as promised on your website

Failing that I wish to submit that due to myself and my wife allocating a substantial amount out of an age –pension to put solar panels on our home we are extremely annoyed that the rules are changing and the feed in tariff is to be heavily reduced and feel that to put it mildly we like many others have been conned into providing this infrastructure at our own cost and now we are about to be ripped-off..

I feel that affair feed-in tariff would be 20cents per KW/Hr which would allow for a profit to be made on the supply when resold.

How can we become the battery of the nation if you continue to put such obstacles in the way of renewable energy

Yours in anticipation of a fair review

Scott White
