

ACRYLIC COUNTER SCREENS

Protect your staff and your customers with PFG's clear acrylic fabricated counter screens. For those Australian businesses looking at extra measures in the fight against COVID-19, these screens are available in a range of sizes, shapes and thicknesses depending on the spaces you are working in and the services you are offering.

They are ideal for counters in chemists and pharmacies, retail stores, petrol stations, bottleshops, newsagents, grocery stores, banks, train and bus stations and reception areas in hotels, or as a divider between staff in offices.

We have manufacturing facilities in Tasmania, Victoria and South Australia and can arrange delivery or installation if required.
