Subject: Suggestion to help stimulate economy

Bridging loan scheme. As a way to boost the building industry. Is the state government looking into the idea of a bridging loan scheme which provides upto 80% of the last bank or rate valuation of a person current residence to enable them to use the funds to build a new property. The funds would be repaid at the sale of the current residence and sale have to occur with 12 - 18 months of the start of the project.

Regards
