

Figure 20: Glengarry Hills curve – Link 05 chainage 7.3 (Google Map Data ©2021)

2.10.2 Birralee Main Road – Link 94 chainage 8.4

The second area of concern raised at the public information session was a horizontal curve on Birralee Main Road at Link 94 CH 8.4 on the approach to the Frankford Main Road intersection. A nearby property owner noted this curve as being highly dangerous and requested whether something could be done about it in terms of road realignment. This corner was also raised by a number of other people and should be investigated during design. This anecdotal evidence is supported by the crash history on the curve, with five crashes here in the past ten years, including one “serious”. Refer to Figure 21 for a plan highlighting the curve in question.

Section 2.4 shows the operating speed and stopping sight distance respectively for this section of Birralee Main Road. The operating speed at this curve is approximately 70 km/h which is due to a number of sequential horizontal curves. The SSD however appears to be acceptable for 100 km/h on this curve. Crash history data in Section 2.6 identifies a cluster of crashes at this corner in the past ten years which is consistent with anecdotal evidence provided by stakeholders and the public display session.

Figure 21: Birralee Road corner – Link 94 chainage 8.4 (Google Map Data ©2021)

2.10.3 Intersections

There are a number of intersections along both Frankford Main Road and Birralee Main Road which would benefit from formalised right and/or left turn facilities. Intersection upgrades do not form part of the scope of this project however, and therefore budget is not available to incorporate them.

The main intersections along the roads are summarised in Table 11. There are also a number of access roads in addition to these.

Table 11: Intersections along Frankford Main Road and Birralelee Main Road

Road	Link No.	Chainage (km)	Intersection Name
Frankford Main Road (A1044)	05	2.77	Long Plains Road
		4.15	Loop Road
		6.55	Loop Road
		6.87	Kerrisons Road
		7.10	Glengarry Drive
	21	0.37	Glengarry Road
		0.55	Turkey Farm Road
		2.13	Lamont Road
Birralelee Main Road (A1701)	8	2.70	Eggmont Reserve Rest Area
		8.32	Selbourne Road
	94	4.68	Priestleys Lane
		6.69	Delantys Road
		9.94	Ginns Road

3. Road widening and pavement rehabilitation options

A separate pavement design report has been prepared which summarises all details regarding the existing pavement condition and the recommended pavement widening and rehabilitation designs. The target road widths for both Frankford Main Road and Birralelee Main Road as provided by the Department are as follows:

- Total Sealed Lanes 2 No. 6 m
- Total Sealed Shoulders 2 m
- Total Unsealed Shoulders 1 m
- Total Seal Width 8 m; and
- Total Carriageway Width 9 m.

A section of Frankford Main Road was initially assumed to be excluded from the scope and budget during the early scoping phase of the Northern Roads Package, since seal width data supplied by the Department showed the existing widths were close to the desired seal width. This is between Link 05 CH 2.82 to CH 8.06, and Link 21 CH 0.00 to CH 0.38. Deflectograph data showed that pavement rehabilitation was required between Link 05 CH 5.12 and CH 6.10 however, so this was included in the scope. Survey data has subsequently shown though that these widths were not accurate, and widening is required along sections. pitt&sherry has only been engaged to design the sections initially in the scope, however at the time of writing the Department has now requested for pitt&sherry to provide a change order to design the sections initially assumed to be sufficient in width, and additional budget will be required to be sought to construct these sections.

The widening on Frankford Main Road was also agreed with the Department to tie in at Stoney Brook Bridge at Link 05 CH 0.97, rather than taking the widening all the way to the West Tamar Highway intersection. This section between the West Tamar Highway and the bridge has a 60 km/h speed limit with a number of residential dwellings.

To simplify the above, Frankford Main Road is broken down into the follow sections, summarised in Table 12 and Figure 22.

Table 12: Frankford Main Road sections

Link No.	Chainage (km)	Section	Comment
05	0.97 to 2.82	1	In current scope
05	2.82 to 5.12	2	Out of current scope (requiring change order for design and additional construction budget)
05	5.12 to 6.10	3	In scope
05	6.10 to 8.06	4	Out of current scope (requiring change order for design and additional construction budget)
21	0.00 to 0.38		
21	0.38 to 5.47	5	In scope

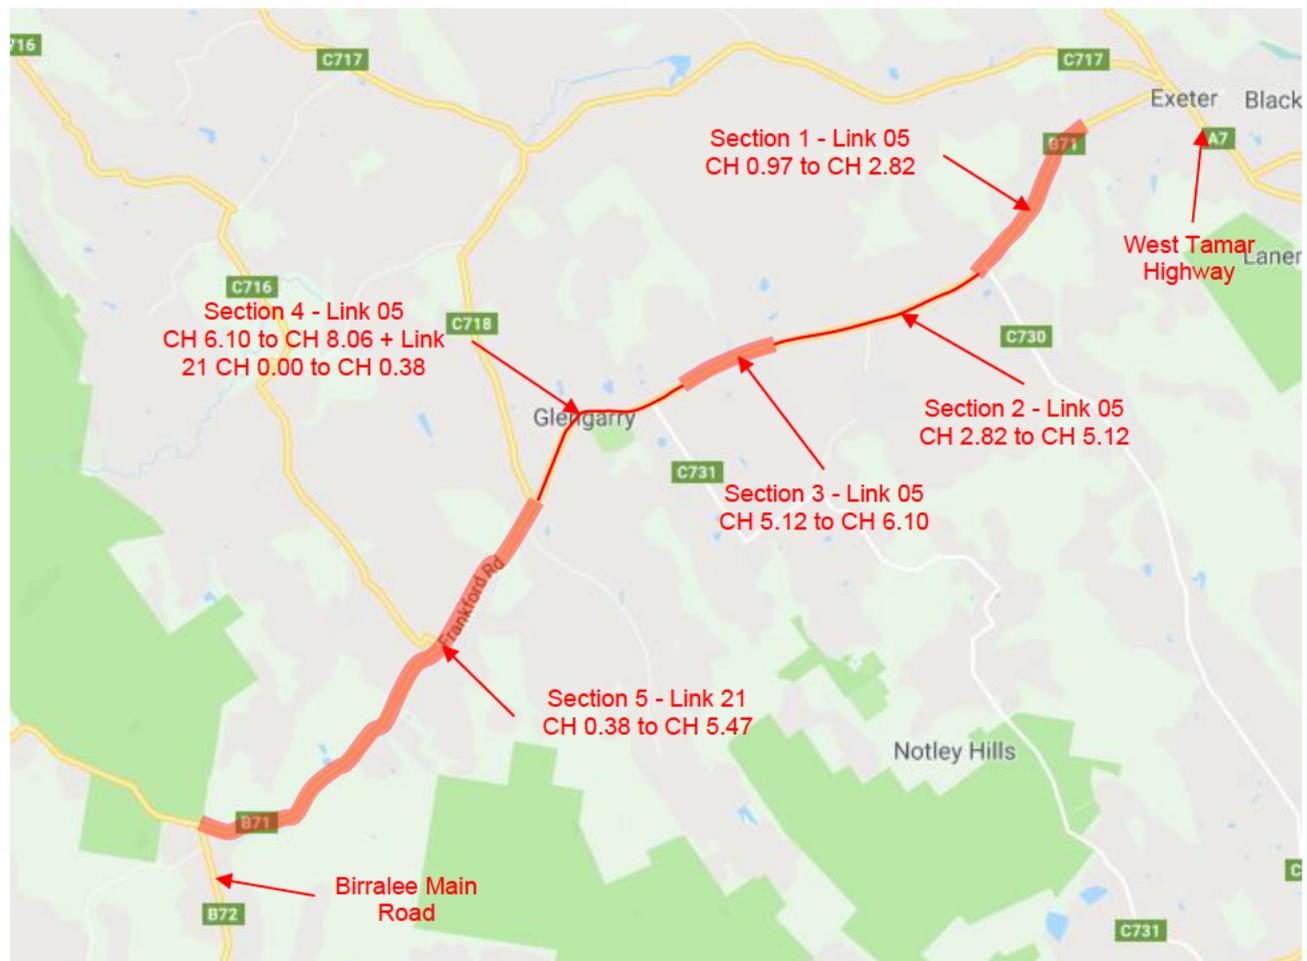

Figure 22: Frankford Main Road sections (Google Map Data ©2021)

The following sections explore the options for pavement widening and rehabilitation for Frankford Main Road and Birralee Main Road with the target of remaining within the remaining budget. The cost estimates for Frankford Main Road have been broken up into sections as discussed to account for those which were originally in scope and those which weren't.

3.1 Northern Roads Package remaining budget

Commonwealth Project Proposal Reports (PPR) have been previously submitted for the Northern Roads Package scoping phase works and for the Batman Highway development and delivery works. Table 13 outlines the total budget; claims for the scoping phase works and for the Batman Highway development and delivery works; and the remaining budget for Frankford Main Road and Birralelee Main Road.

Table 13: Northern Roads Package remaining budget

	Total P50	Total P90
Total Budget	\$50,300,000	\$55,000,000
Northern Roads Scoping Phase PPR	\$2,921,979	\$3,191,289
Batman Development and Delivery PPR	\$17,734,152	\$19,432,567
Remaining for Frankford + Birralelee Development and Delivery PPR	\$29,643,869	\$32,376,144

The following sections outlining Cost Estimates for each option are preliminary engineer's estimates only. Actual prices, costs and other variables may be different to those used to prepare the Cost Estimate and may change. Unless specified in this report, no detailed quotation has been obtained for actions identified in this report. pitt&sherry does not represent, warrant or guarantee that the project can or will be undertaken at a cost which is the same or less than the Cost Estimate. A further breakdown of the engineer's Cost Estimate for each section is provided in Appendix E.

Where estimates of potential costs are provided with an indicated level of confidence, notwithstanding the conservatism of the level of confidence selected as the planning level, there remains a chance that the cost will be greater than the planning estimate, and any funding would not be adequate. The confidence level considered to be most appropriate for planning purposes will vary depending on the conservatism of the user and the nature of the project. The user should therefore select appropriate confidence levels to suit their particular risk profile.

3.2 Estimate assumptions

3.2.1 Construction methodology and timeframe

The project will be separated into multiple packages for the delivery of the construction works, however it is currently unknown how these will be broken down. The packages for Frankford will not necessarily align with the stages outlined in Table 12 and Figure 22.

The Department of State Growth is anticipating that the construction of the Frankford Main Road and Birralelee Main Road portions of the Northern Roads Package is to occur over the 2022/2023 and 2023/2024 construction seasons. It is assumed the majority of the works will be constructed over the 2022/2023 season.

Delivery of additional works proposed to be undertaken outside the construction contract but included in the Cost Estimate will be arranged separately by the Department of State Growth.

3.2.2 Rates

Rates are expected to be representative of the size and type of project being undertaken and that market conditions at the time of tendering will be comparable to those prevailing when historical tendered rates were obtained.

3.3 Estimate source information

3.3.1 Quantities

All quantities have been extracted from the OpenRoads concept design models for each road.

The concept models used to derive the quantities assume equal widening on both sides of the road. These will be optimised during the design phase to minimise impacts by widening on one side of the road only where it is deemed feasible.

3.3.2 Source of rates

Rates are based on experience of historical data and industry experience in Tasmania at this point in time.

Caution is necessary when using historical data as no project is exactly the same. The full background and scope of historical projects are in most cases not fully known by the Estimator and historical Contractor's rates include perceived risk which may or may not be present in the current project. Rates also tend to be weighted so that activities undertaken first are higher than the actual cost to the Contractor so that a positive cash flow is generated at the start of a project.

No rise/fall is expected.

3.3.3 Lead time escalation

Based on the Australian Bureau of Statistics for September 2021, escalation has been taken as the Consumer Price Index (CPI) value of 3%. Given the construction staging is currently not known, a single year of escalation has been applied at 3%, with the assumption that the majority of the works will be constructed (or at least scheduled) during the 2022/2023 construction season.

3.3.4 Contingency – Engineer's estimate

As an engineer's estimate, a contingency of 25% has been applied to the base estimate for each option.

3.4 Client costs

Client costs have been determined as follows:

- Costs incurred to date have been included at the rate incurred
- Costs for the design of the additional Section 2 and Section 4 of Frankford Main Road are assumed on a pro-rata basis. Costs for the design of the remainder of Frankford Main Road and Birralelee Main Road are as per the agreed values
- Department of State Growth project management staff time has been assumed as 7.3% of the base estimate.
- Contract administration costs during the delivery phase area assumed as 1% of the base construction estimate
- Insurances are assumed to be 0.45% of the base construction estimate; and
- An allowance has been made for land acquisition on a pro-rata basis compared to previous similar projects. This is an allowance only at this stage and is subject to change, as actual impacts on land boundaries are not known.

3.5 Option 1a – Full length shoulder widening only – No rehabilitation or safety upgrades

This option involves widening the shoulders along the full length of both Frankford Main Road (to the Birralee Main Road intersection) and Birralee Main Road but excludes pavement rehabilitation and other upgrades to intersections and safety issues identified in Section 2.10. A concept design cost estimate for this option is shown in Table 14.

The Glengarry Hills corner identified as an issue in Section 2.10.1 is located within Stage 4 of Frankford Main Road in the table below. The cost estimate for this option and Option 1b only considers shoulder widening through this area, which is not likely to fully address the safety concerns without some level of realignment.

Table 14: Option 1a concept engineer's estimate

Location	Item	Quantity	Unit	Rate	Amount
Frankford Main Road	Section 1: Link 05 CH 0.97 to CH 2.82	1	Item	\$1,378,000	\$1,378,000
Frankford Main Road	Section 2: Link 05 CH 2.82 to CH 5.12	1	Item	\$1,806,000	\$1,806,000
Frankford Main Road	Section 3: Link 05 CH 5.12 to CH 6.1	1	Item	\$852,000	\$852,000
Frankford Main Road	Section 4: Link 05 CH 6.1 to CH 8.06 + Link 21 CH 0.00 to CH 0.38	1	Item	\$1,663,000	\$1,663,000
Frankford Main Road	Section 5: Link 21 CH 0.38 to CH 5.47	1	Item	\$3,863,000	\$3,863,000
Frankford Main Road	Subtotal				\$9,562,000
Birralee Main Road	All	1	Item	\$14,562,000	\$14,562,000
Total Base Estimate - Construction					\$24,124,000
Development Phase		Design			\$2,311,824
		Department PM		7.30%	\$168,763
Delivery Phase		Contract Administration			\$241,240
		Insurance		0.45%	\$108,558
		Acquisitions			\$1,230,000
		Department PM		7.30%	\$1,876,377
Total Base Estimate (Rounded)					\$30,061,000
Contingency				25%	\$7,515,000
Escalation				3%	\$1,127,000
Total Estimate					\$38,703,000

The cost estimate for this option exceeds the available remaining budget (Table 13), and therefore is not viable under this funding source alone.

3.6 Option 1b – Full length shoulder widening and rehabilitation – No safety upgrades

This option involves widening the shoulders along the full length of both Frankford Main Road (to the Birralee Main Road intersection) and Birralee Main Road but excludes other upgrades to intersections and safety issues identified in Section 2.10. A concept design cost estimate for this option is shown in Table 15.

The Glengarry Hills corner identified as an issue in Section 2.10.1 is located within Stage 4 of Frankford Main Road in the table below. The cost estimate for this option and Option 1b only considers shoulder widening through this area, which is not likely to fully address the safety concerns without some level of realignment.

Table 15: Option 1b concept engineer's estimate

Location	Item	Quantity	Unit	Rate	Amount
Frankford Main Road	Section 1: Link 05 CH 0.97 to CH 2.82	1	Item	\$1,481,000	\$1,481,000
Frankford Main Road	Section 2: Link 05 CH 2.82 to CH 5.12	1	Item	\$1,915,000	\$1,915,000
Frankford Main Road	Section 3: Link 05 CH 5.12 to CH 6.1	1	Item	\$914,000	\$914,000
Frankford Main Road	Section 4: Link 05 CH 6.1 to CH 8.06 + Link 21 CH 0.00 to CH 0.38	1	Item	\$1,761,000	\$1,761,000
Frankford Main Road	Section 5: Link 21 CH 0.38 to CH 5.47	1	Item	\$3,997,000	\$3,997,000
Frankford Main Road	Subtotal				\$10,068,000
Birralee Main Road	All	1	Item	\$15,399,000	\$15,399,000
Total Base Estimate - Construction					\$25,467,000
Development Phase		Design			\$2,311,824
		Department PM		7.30%	\$168,763
		Contract Administration		1.00%	\$254,670
Delivery Phase		Insurance			\$114,602
		Acquisitions			\$1,230,000
		Department PM		7.30%	\$1,975,838
Total Base Estimate (Rounded)					\$31,523,000
Contingency				25%	\$7,881,000
Escalation				3%	\$1,182,000
Total Estimate					\$40,586,000

The cost estimate for this option exceeds the available remaining budget (Table 13), and therefore is not viable under this funding source alone.

3.7 Option 2a – Shoulder widening only – Limited scope – No rehabilitation or safety upgrades

This option involves widening of the shoulders along the full length of Birrale Main Road and along a limited section of Frankford Main Road but excludes pavement rehabilitation and other upgrades to intersections and safety issues identified in Section 2.10.

Note that for this option and Option 2b, the sections of Frankford Main Road exclude those sections which were previously assumed to be sufficiently wide before detailed survey was obtained. These are the only sections which pitt&sherry have so far been engaged to design widening for. A concept design cost estimate for this option is shown in Table 16.

Table 16: Option 2a concept engineer's estimate

Location	Item	Quantity	Unit	Rate	Amount
Frankford Main Road	Section 1: Link 05 CH 0.97 to CH 2.82	1	Item	\$1,378,000	\$1,378,000
Frankford Main Road	Section 2: Link 05 CH 2.82 to CH 5.12	1	Item	\$0	\$0
Frankford Main Road	Section 3: Link 05 CH 5.12 to CH 6.1	1	Item	\$852,000	\$852,000
Frankford Main Road	Section 4: Link 05 CH 6.1 to CH 8.06 + Link 21 CH 0.00 to CH 0.38	1	Item	\$0	\$0
Frankford Main Road	Section 5: Link 21 CH 0.38 to CH 5.47	1	Item	\$3,863,000	\$3,863,000
Frankford Main Road	Subtotal				\$6,093,000
Birrale Main Road	All	1	Item	\$14,562,000	\$14,562,000
Total Base Estimate - Construction					\$20,655,000
Development Phase		Design			\$1,955,213
		Department PM		7.30%	\$142,731
Delivery Phase		Contract Administration			\$206,550
		Insurance		0.45%	\$92,948
		Acquisitions			\$1,230,000
		Department PM		7.30%	\$1,619,468
Total Base Estimate (Rounded)					\$25,902,000
Contingency				25%	\$6,476,000
Escalation				3%	\$971,000
Total Estimate					\$33,349,000

The cost estimate for this option is close to the remaining budget (Table 13), and therefore is a viable option with some refinement during detail design.

3.8 Option 2b – Shoulder widening and rehabilitation – Limited scope – No safety upgrades

This option involves widening of the shoulders along the full length of Birralee Main Road and along a limited section of Frankford Main Road; and pavement rehabilitation where it has been deemed required in the pavement design report. This excludes other upgrades to intersections and safety issues identified in Section 2.10. A concept design cost estimate for this option is shown in Table 17.

Table 17: Option 2b concept engineer's estimate

Location	Item	Quantity	Unit	Rate	Amount	
Frankford Main Road	Section 1: Link 05 CH 0.97 to CH 2.82	1	Item	\$1,481,000	\$1,481,000	
Frankford Main Road	Section 2: Link 05 CH 2.82 to CH 5.12	1	Item	\$0	\$0	
Frankford Main Road	Section 3: Link 05 CH 5.12 to CH 6.1	1	Item	\$914,000	\$914,000	
Frankford Main Road	Section 4: Link 05 CH 6.1 to CH 8.06 + Link 21 CH 0.00 to CH 0.38	1	Item	\$0	\$0	
Frankford Main Road	Section 5: Link 21 CH 0.38 to CH 5.47	1	Item	\$3,997,000	\$3,997,000	
Frankford Main Road	Subtotal				\$6,392,000	
Birralee Main Road	All	1	Item	\$15,399,000	\$15,399,000	
Total Base Estimate - Construction					\$21,791,000	
Development Phase		Design			\$1,955,213	
		Department PM		7.30%	\$142,731	
Delivery Phase		Contract Administration			1.00%	\$217,910
		Insurance		0.45%	\$98,060	
		Acquisitions			\$1,230,000	
		Department PM		7.30%	\$1,703,599	
Total Base Estimate (Rounded)					\$27,139,000	
Contingency				25%	\$6,785,000	
Escalation				3%	\$1,018,000	
Total Estimate					\$34,942,000	

The cost estimate for this option is slightly over the remaining budget. Given the pavement design report has recommended that shoulder widening alone is not a suitable option without pavement rehabilitation where required, this option is required to be adopted in preference to Option 2a. Given the estimate is in excess of the remaining budget, it cannot be guaranteed that the entire scope can be delivered within the available budget. Some refinement of this option may be possible during detailed design in order for it to stay within the remaining budget without requiring additional funding.

3.9 Intersection and safety upgrades

Since it is anticipated that the remaining budget is only just sufficient for shoulder widening and pavement rehabilitation, there is no budget available to increase the scope to incorporate any intersection improvements or alignment geometry improvements as identified in Section 2.10.

Cost estimates and concept options have not been developed for these works.

It is recommended that alternative funding is sought to address some of these concerns, in particular the Glengarry Hills section which is in Stage 4.

The curve on Birralee Main Road identified in Section 2.10.2 is within the scope of the Northern Roads Package for widening and pavement rehabilitation, but realignment improvements cannot be incorporated within the remaining budget. It is recommended that this be investigated during the detailed design phase whether some minor realignment can be incorporated within the remaining budget to address this safety concern.

3.10 Northern Roads Package – Stage 2 – Frankford Main Road and Birralee Main Road – Development and delivery project proposal report

At the time of writing, a draft development and delivery Project Proposal Report (PPR) for Stage 2 of the Northern Roads Package has been submitted to the Department for review, approval and submission to the federal government for funding. A requirement of the PPR submission was that the total Northern Roads Package P90 budget of \$55 million was to remain, and therefore the cost estimate provided for Stage 2 needs to total approximately the remaining budget shown in Table 13.

In order to meet this, as agreed with the Department in a project meeting with pitt&sherry in October 2021, the cost estimate for Option 2b was adopted. The scope was required to be reduced in order to remain within the budget available to be claimed in the PPR.

Additional funding will be required in order to design and construct the remaining sections of Frankford Main Road which were originally excluded from the scope.

4. Conclusion and recommendations

This Options Analysis report summarises the existing road data available for Frankford Main Road and Birralelee Main Road and considers options for Stage 2 of the Northern Roads Package in order to maximise the benefits to each road within the remaining budget available.

There are a number of alignment and intersection deficiencies identified in Section 2. However, since alignment improvements do not form part of the scope for this project, these will likely remain upon completion of the project. It is important the Department understand and accept these deficiencies, which is implicit in the scope of this project for shoulder widening and pavement rehabilitation only.

Of the options presented in Section 3, it is recommended that Option 2b is chosen to progress through to the design phase to provide the best chance to deliver the project within the remaining budget available, whilst also adhering to the pavement design report recommendations. This has been agreed to with the Department in a project meeting with pitt&sherry in October 2021. Given the estimate for Option 2b is in excess of the remaining budget, it cannot be guaranteed that the entire scope can be delivered within the monies available. Some refinement of this option may be possible during detail design for it to stay within the remaining budget without requiring additional funding. Additional funding will be required to complete the excluded sections of Frankford Main Road.

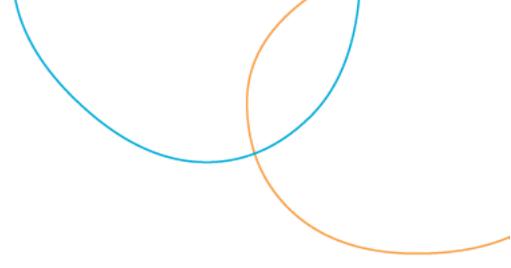

Option 2b excludes sections of Frankford Main Road which are now known to require widening. At the time of writing, the Department has requested for pitt&sherry to provide a change order to design these sections which are currently excluded from the scope. Additional budget will also be required to construct these sections, one of which includes a problematic corner at Glengarry Hills which will likely require some realignment (noting the engineer's estimates provided do not include any realignment works). It is strongly recommended that these sections are included in the project to complete the Northern Roads Package, despite the additional budget these will require.

One of the next stages will be to determine with the Department how to breakdown the construction of Frankford Main Road and Birralelee Main Road into packages including priority whilst maximising the construction efficiency.
